VARSHA BHATT

QA Engineer | Manual & API Testing | Web & Mobile Testing
+917974656773 • bhattversha10@gmail.com • LinkedIn • Indore, India

Professional Summary

QA Engineer with 3+ years of experience testing web, mobile (Android/iOS), and PWA applications across fintech, e-commerce, healthcare, and EV/energy domains. Skilled in manual, functional, regression, exploratory, and API testing, with a strong command of STLC, SDLC, and the defect life cycle in Agile/Scrum teams. Experienced with JIRA, Postman, and LambdaTest for defect tracking, REST API validation, and cross-browser testing. Achieved a 95% defect resolution rate and reduced cross-browser compatibility issues by 30%, supporting stable, high-quality releases across multiple client projects.

Skills

Testing Types	Manual Testing, Functional Testing, Regression Testing, Smoke Testing, Sanity Testing, Retesting, Exploratory Testing, Black Box Testing, UI/UX Testing, Cross-Browser Testing, Responsive Testing, API Testing, Non-Functional Testing, Mobile App Testing (Android & iOS), PWA Testing
Tools	JIRA, Postman, LambdaTest, Browser DevTools (Inspect), Trello
Process & Methodologies	Agile (Scrum), SDLC, STLC, Defect Life Cycle, Test Scenario & Test Case Design, Requirement Analysis, Bug Reporting & Tracking, Test Reporting, UAT Support
Platforms	Windows, Linux
Soft Skills	Analytical & Problem-Solving, Communication & Team Collaboration, Detail-Oriented, Time Management & Multitasking

Professional Experience

Codezilla Technology & Consultancy Pvt. Ltd — Indore

QA Engineer — Feb 2023 - Present

- Plan and execute functional, regression, retesting, exploratory, smoke, sanity, and performance testing for web and mobile applications across multiple client projects in Agile/Scrum environments.
- Design and execute test scenarios and test cases from requirements, achieving a 95% defect resolution rate.
- Log, track, and retest defects in JIRA, working closely with developers to speed up issue resolution.
- Perform cross-browser and responsive testing with LambdaTest, reducing compatibility issues by 30%.
- Validate REST APIs using Postman for accuracy, reliability, and data integrity.
- Prepare detailed test reports and bug analyses for internal teams and clients to support release decisions.

Projects

Maji - Financial Wellbeing & Money Management Platform

Team of 8 | Website: maji.io/
Tech stack: Python (Django), Angular

A platform that helps businesses track and improve the financial wellbeing of their employees.

- Analyzed requirements, created test scenarios, and executed test cases for web and PWA features.
- Carried out UI, cross-browser, and PWA testing on Android and iOS.
- Logged, tracked, and retested defects through the full defect life cycle.

Specxweb - E-commerce Platform for Eyeglasses

Team of 6 | Website: specxweb.com/

A B2B/B2C optical retail platform offering extensive inventory, competitive pricing, and a seamless shopping experience.

- Conducted end-to-end functional and UI testing for vendor and customer journeys, improving the shopping experience.
- Verified the integration of inventory and pricing features.
- Managed defect tracking and supported the smooth deployment of a unified loyalty program.

MYCareBridge - Healthcare Communication Platform (ASD/ADHD Assessments)

Team of 6 | Website: mycarebridge.co.uk/
Tech stack: NestJS (backend), React (frontend)

A secure platform for exchanging information between clinicians, educational settings, and parents/carers.

- Performed functional and API testing to ensure accuracy, reliability, and secure data exchange.
- Executed regression and exploratory testing to improve system stability and performance.

Thriving.ai - Health & Social Care Platform for Older Adults

Team of 4 | Website: thriving.ai/

A platform that connects older adults with community participation and keeps family caregivers informed.

- Clarified requirements, created and executed test scenarios, and logged, tracked, and retested defects.
- Performed functional and UI testing, and tested the mobile app on Android and iOS.

RightCharge - EV Home Charging Platform

Team of 4 | Website: rightcharge.co.uk/

Tech stack: Python (Django), Vue.js

A platform that helps users choose the right EV charger, arrange installation, and find cost-effective energy tariffs.

- Created and executed test scenarios covering functional and non-functional requirements.
- Performed API testing and logged, tracked, and retested defects.

Education

Radharaman Engineering College

Bhopal, India

Bachelor of Engineering (B.E.), Computer Science Engineering

2014 - 2018

- First Division

Key Achievements

Cross-Browser Testing Success

Reduced cross-browser compatibility issues by 30% through responsive testing.

High Defect Resolution Rate

Achieved a 95% defect resolution rate by optimizing testing processes.

Optimized Load Performance

Performed load tests, improving system response time for up to 10,000 concurrent users.

Enhanced User Experience

Improved user satisfaction by 25% through improvements driven by functional and UI testing.
